

Tel-Instrument will be in Memphis TN May 9th to the 12th showcasing the new SDR-Omni NAV/COMM Test Set. Please stop by our booth and see the latest in avionics ground support equipment.

TIC's revolutionary SDR-OMNI Flight Line Test Set provides the avionics technician with a comprehensive suite of RF avionics test capability in a single ruggedized, yet lightweight, package for demanding commercial and military customers. The unit features a highly readable and responsive color touchscreen for quick and convenient avionics testing – especially for performing FAA required transponder, ADS-B, and ELT tests. Professionally formatted reports can be downloaded via USB or wirelessly printed to a local wireless printer.
