

Description

The TR-36 has been discontinued on May 15, 2025. The replacement is the SDR-OMNI All-In-One Test Set.

The TR-36 NAV/COMM/ELT/EPIRB Test Set is Tel-Instrument Electronics Corp. latest offering. Updated to the latest in hardware and software the TR-36 can easily provide comprehensive ramp testing in an user-friendly, light weight high-precision instrument for rapid functional testing of VOR, LOC/GS, MB, and VHF COMM (AM/FM), ELT and EPIRB avionic equipment all in a weather proof package with color display.

Tel-Instrument is known for our intuitive and innovative user interface, but now updated to include ELT, EPIRB and SELCAL. The TR-36 with its industry leading, long battery life, rugged and light weight package and easy to see and use COLOR front screen. The TR-36 packs all of the latest features with unsurpassed reliability, performance and resolution of all measured or transmitted parameters.

NOTICE - The TR-36 will be discontinued on October 15th 2024. The SDR-OMNI All-in-One Test Set will replace the TR-36. The SDR-OMNI provides the avionics technician with a comprehensive suite of RF test capabilities with a large color touchscreen display in a single ruggedized, yet lightweight, package for demanding commercial and military customers.

Test capabilities included (but limited to): Communications AM/FM (200 kHz to 1.6 GHz), ATC Transponder, ADS-B IN/OUT, TCAS I&II, DME, SELCAL, ELT/APIRB, VSWR, Distance to fault and a Remote direct Connect to an Android, Apple or Laptop.
