

Description

The T-47NH has been discontinued on May 15, 2025. The replacement for this model is the SDR-OMNI/MIL All-In-One Test Set.

The T-47NH Multifunction Ramp Test Set is a battery powered portable unit used to test the operation of Transponders and Interrogators including: Mode S Transponders, TCAS Interrogators, and TACAN/DME equipment that are installed in aircraft and other vehicles. Tests of both Transponders and Interrogators can be performed by using the T-47NH directional antenna to radiate to and from the unit-under-test (UUT) or by directly connecting to the UUT antenna port.

The T-47N provides test capability for Mode S Elementary and Enhanced Surveillance. The T-47N can receive and display information contained in Mode S DF-17 Extended Squitter (ADS-B).

The T-47NH is self-contained comprising of a built-in battery charger and all accessories are neatly stored within the removable cover. An easy to understand front panel interface controlled by the use of toggle switches with an easy to read display makes use simple and requires little or no training. The supplied directional antenna with an active LED and optical sight is used for both interrogator and transponder testing. The battery is installed and removable through the front panel. Utilize the OPTIONAL KIR/KIT cable with a KIT/KIR computer module or interchange it with a KIV-6 module which fits neatly in the provided bay.
