

Parts Department

REPLACEMENT PARTS. ACCESSORIES. PRODUCT SUPPORT.

Tel-Instrument Electronics Corp. provides replacement parts, accessories, batteries, and other available support items for current and selected legacy avionics test equipment.

Our Parts Department can assist with part identification, availability, quotations, and estimated lead times for supported Tel-Instrument products.

Parts Availability and Purchase Requirements

Accessories, batteries, and many replacement items may be purchased directly from Tel-Instrument, subject to availability.

Assemblies and internal component parts are available only to Tel-Instrument Certified Service Centers and are subject to product support status and parts availability. **Parts**

Availability and Lead Times

Not all spare or replacement parts are maintained as stocked inventory. Availability may vary based on the product, component obsolescence, supplier availability, and current manufacturing requirements.

Lead times for spare parts may vary significantly. Some items may be available from stock, while others may require procurement or manufacturing before shipment. The Parts Department will provide availability and estimated lead time information when responding to your inquiry.

Before Submitting a Parts Request

To help us identify the correct item and respond as quickly as possible, please provide the Tel-Instrument product model, part number if known, unit serial number, and a description of the part or accessory required.

For assemblies or internal component parts, Certified Service Centers should include their

company name and service center information with the request.

Contact the Parts Department

Please complete the form below to request parts availability, pricing, or lead time information. Our Parts Department will review your inquiry and respond with the appropriate information.
