

Tel-Instrument Electronics Corp. is the industry leader in developing and producing field-tested, rugged avionic flight line and bench test sets for demanding military and commercial customers.

Tel-Instrument was founded in 1947, and has been providing avionic ramp and bench testers to both commercial and military customers for the last 35 years. Tel-Instruments historical design emphasis has been to provide the customer with user-friendly, rugged, reliable, and affordable units.

Tel's products have led the avionics support equipment industry to higher levels of integration by combining more test functions into a single unit, and thereby reducing customer acquisition, training, and life-cycle support costs. Tel-Instrument is strongly committed to taking lifetime responsibility for product design, function, and reliability, for depot-level support, and for configuration management.

Tel-Instrument is ISO-9001:2015 quality certified; is compliant to ESD standard ANSI/ESD S20.20 and its products have received CE certification for sales into Europe.
