

Tel-Instrument Announces Partnership with WEBSEC Corporation to Expand Mode 5 IFF Test Solutions

Tel-Instrument Electronics Corp. (TIC) is pleased to announce a strategic partnership with WEBSEC Corporation to provide advanced Mode 5 IFF accessories and emulation products for use with the Tel-Instrument T-47/M5 and TS-4530A avionics test systems.

Through this partnership, Tel-Instrument customers now have direct access to WEBSEC's industry-proven KIV-77 Adapter and IFF Mode 5 Emulator, providing an integrated solution for engineering, production, maintenance, and laboratory testing of modern Mode 5 Identification Friend or Foe (IFF) systems.

These products complement TIC's existing military avionics test capabilities by allowing customers to expand their test configurations without the need to source components from multiple suppliers.

Available Products

- KIV-77 Adapter
- IFF Mode 5 Emulator

Benefits

- Fully compatible with Tel-Instrument T-47/M5 and TS-4530A test systems
- Supports laboratory, depot, production, and field maintenance environments
- Simplifies Mode 5 integration and verification
- Single-source procurement through Tel-Instrument
- Supported by the combined engineering expertise of Tel-Instrument and WEBSEC

This partnership reflects Tel-Instrument's continued commitment to providing complete avionics test solutions for military and government customers worldwide.
