Product

Support Plans

Keep Your Equipment Mission Ready

Your avionics test equipment is a long-term investment. Tel-Instrument Product Support Plans are designed to maximize operational readiness, reduce unexpected repair costs, and extend the service life of your equipment through factory-backed warranty protection, calibration services, repairs, software updates, and technical support.

Factory Support From The Engineers Who Designed Your Equipment. **Why** Choose a Tel-Instrument Support Plan?

- Extended warranty protection
- Factory calibration services
- Priority repair turnaround
- Latest firmware and software updates
- Direct access to factory technical support
- Genuine Tel-Instrument replacement parts
- Reduced unexpected maintenance costs
- Maximum operational availability

Factory Warranty

Every new Tel-Instrument product includes a factory warranty backed by our Product Support organization. Extended warranty options are available to provide additional years of protection beyond the standard warranty period.

Calibration Plans

Protect your investment with scheduled factory calibration plans designed to maintain

measurement accuracy and equipment readiness throughout the life of your instrument.

- Scheduled calibration intervals
- Performance verification
- Calibration certificates
- Firmware verification
- Covered repairs under qualifying plans*

*Subject to plan terms and conditions.

Factory Repair Services

Repairs are performed by factory-trained technicians using genuine Tel-Instrument replacement parts and the latest engineering revisions to restore your equipment to original operating performance.

Product Training

Factory training is available for operators, technicians, maintenance personnel, and depot organizations. Training can be conducted on-site or at the Tel-Instrument factory depending on your operational requirements.

Supported Product Families

- SDR-OMNI Series
- SDR-OMNI/MIL
- T-47/M5
- TS-4530A
- AN/USM-708A
- AN/USM-719A

Need Help Selecting a Support Plan?

Our Product Support specialists can recommend the support plan best suited for your equipment, operational environment, and maintenance requirements.
